**Services:**  
Pre-Design  
Inventory & Analysis  
Schematic Design  
Design Development  
Construction Documents

**Role:** Sub Consultant

**Project Size:** 1 acre

**Project Cost:** NA

Hays LAS worked as a sub consultant to McKinley & Associates to design and prepare construction documents for a plaza, streetscape, and associated parking for the new State Building in Logan. The streetscape design along the north and south faces of the building are to act as a template for all future sidewalk development. Hays LAS proposed reusing old street pavers from the demolition of the streets and promoting those pavers in part of the new adjacent sidewalk design. The designated plaza is a closed portion of Cole Street and features several raised planters shaped by a symmetrical criss-crossing network of joint patterns and brickwork. Major brick patterns intersect at a paver quilt star, a symbol of West Virginia heritage that is carried into the foyer of the building.
