## **J.C. Williams/Weirton Rotary Soccer Complex** Weirton, West Virginia

Hays Landscape Architecture Studio, Ltd. created a master plan concept for the Northern Panhandle Youth Soccer Association's 13.4 acre soccer complex.

Upon completion of all phases, Northern West Virginia will have a first class tournament level facility with park shelter/restrooms, a 1/2 mile ADA accessible community walking trail, and tree plantings to define spaces within the property.

The northern most fields will have the capacity to allow play in two directions, thus maximizing potential for all age groups. The southern most field is to be the "premier" professional soccer field.

The most unique aspect of this project, however, is the fact that the entire complex is to be constructed on an old landfill thereby bringing a once unattractive site back as a green space for the benefit of the community and the northern panhandle's youth.
