Project Size: .7 acres

Project Cost: \$400,00 for site development and landscape

Providing prestige in professional land planning and design."

Oglebay's Wilson Lodge Addition Wheeling, West Virginia

Oglebay Resort is a premier year round resort in Wheeling, West Virginia. The addition of a 53 room lodge building was built with significant input, design and construction documentation from Hays LAS.

Principal Gabe Hays worked with owners to choose a location for the building and site the building. Hays LAS designed several elaborate courtyard schemes and completed a roads and parking study.

Hays LAS produced construction documents for the site development around the lodge building in coordination with the project architects, DRS, and the project engineer, Vaughn Coast and Vaughn.
