Future Phase Plan
Master Plan
Construction Administration
Construction Observation
Role: Prime
Project Size: .36 acres
Project Cost: \$1.7 million

Hays LAS began working with Marshall County Commission on Grand Vue Park in 2002.

Projects include:

- Full Park Comprehensive Master Planning,
- Cabin Development,
- Family Fun Miniature Golf
- Playground
- Paving Project
- Aquatic Center

Hays LAS assembled a team of architects and engineers to design a three phase master plan. Phase one development includes the activity pool, splash ground, pool house and filter building rehabilitation, new concrete deck, ticket building, and ADA ramp. Construction began in July of 2009 and the park plans to open the Aquatic Center in the spring of 2010. Craig White, Park Manager, has expressed the community's excitement and is confident that both Phase II and Phase III will be implemented in the following seasons.
