Construction Observation

Role: Prime

Project Size: 2.4 acres

Project Cost: \$100,000

In spring of 2008, Hays LAS contracted with Seven Springs Resort to develop a site design for a new spa. The project scope included: new parking delineation, storm water management, full planting plan, outdoor decking and patio space.

In keeping with one of the Hays LAS core values of "Genius Loci," or spirit of the place, the patio/deck "leaf" concept (shown) came from the spa's location in the Laurel Highlands.

Patrons will enjoy a series of pools and waterfalls at both the upper deck and lower patio levels. The planned surrounding woodland landscape of Rhododendrons, ferns and native stone, celebrates the natural beauty and heritage that is the Laurel Highlands.
