Kasprowski Residence Belmont, OH

Services:
Conceptual Development
Master Planning
Construction Documents
Bidding or Negotiation
Construction Observation

Role: Prime

Project Size: .5 acres

Project Cost: \$45,000

In a design for the Kasprowski Residence, Hays LAS looked to provide the front landscape of the home with balance and enclosure. The design solution included the construction of a garden structure that would pick up on the architectural detailing of the house.

The result created a unified design appearance that connected the ornamental fence, large yard space, and meadows beyond into an aesthetic presentation for the house. Adjacent to Barkcamp State Park entrance, this structure presents a positive and balanced image of the property.
