

Providing prestige in professional land planning and design."

Adena Streetscape

Adena, OH

Services:
Pre-Design
Inventory & Analysis
Schematic Design

Role: Prime

Project Size: 5.3 acres

Project Cost: \$1,087,038

The quaint community of Adena contracted with Hays LAS to address **streetscape** concerns after completing a water project that would disturb the existing streetscapes.

Adena benefits from the fact that they have never paved over their beautiful brick streets. The proposed design maintains and enhances *brick streets* while restoring the historic *tree lined streets* as seen in old photographs. *Light fixtures* historic to Adena are also to be included in the design. As part of our streetscape philosophy, we also addressed adjacent parks to construct a unique sense of place based on the past.
